## Request for Proposal

### Mobile Field Communications Trailer

(24 foot Trailer-Command Post Capable)

#### Specifications

### CT Region 4

### Emergency Support Function-4, Fire Service Mobile Field Communications Trailer

(24 foot Trailer-Command Post Capable)

Region 4, Emergency Support Function 4 (ESF-4), Fire Service, has determined the inadequacy of emergency field communications at major incidents and public events throughout the region. The Incident Command System (ICS) depends on the presence of a *functional on-site communication system*. During large-scale emergency incidents or events (Sail-Fest, Fairs etc.), Region 4 agencies must be able to communicate, not only with each other, but also with other emergency response agencies.

Region 4, Emergency Support Function 4 (ESF-4), Fire Service, is requesting bids for a regional mobile field communication trailer as part of the Connecticut Regional 4 Homeland Security Strategy. Region 4 (ESF-4) Fire Service *identified a need for interoperability*—the ability for commanders to communicate with each other at the scene of a major emergency—this is a top priority for public safety managers. This field communications trailer will be used to address some of the interoperability issues among all public safety personnel at major incidents.

See attached Drawing.

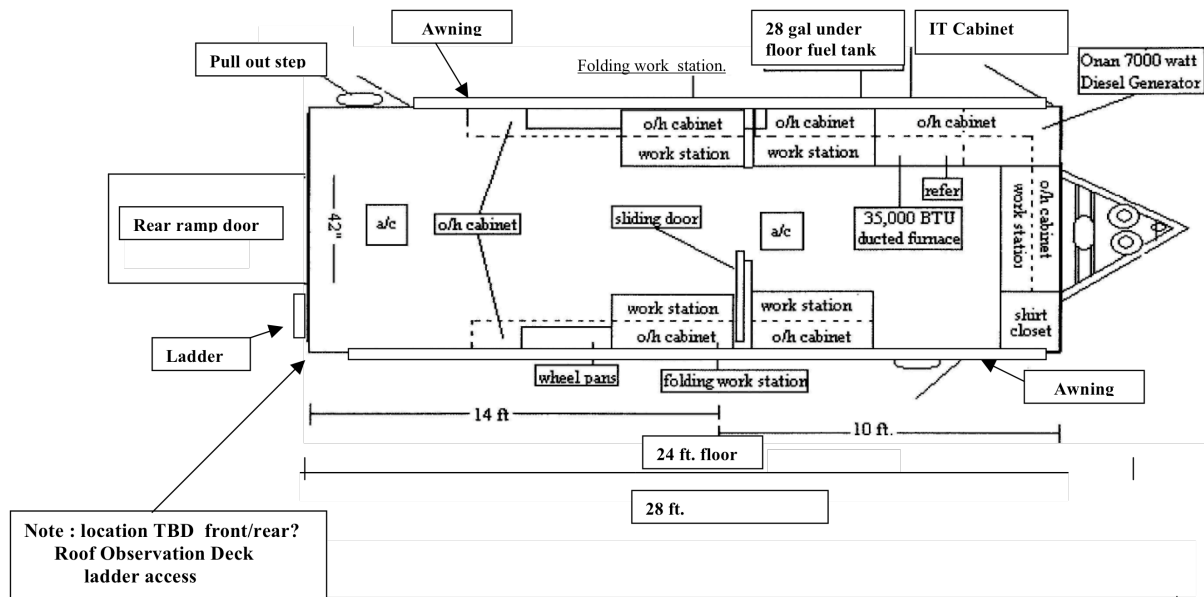

## Please submit Total Price including Shipping
